SUMMARY

- Software developer with **7+ years** of experience in System, Analysis, Design, Develop and Execution of web and mobile applications using Angular,Reactjs,Laravel,Nodejs,Flutter ,React Native and Ionic.
- Excellent capability to explore, learn and understand newer business domains and technology.
- Proficient in developing web applications using Laravel/ Nodejs technologies.
- Exploring my knowledge in **Hybrid mobile app** development with Flutter ,React Native and Ionic.
- Excellent knowledge in GUI design with HTML, CSS, JAVASCRIPT, JQUERY, Bootstrap,TailwindCss, Angular,Reactjs.
- Monitor and manage the core banking Oracle databases..
- Creating kpi reports using the users requests and core banking database..

TECHNICAL SKILLS

Programming Languages	: PHP ,JAVASCRIPT AND DART.
Web server technologies	: NODEJS,LARAVEL,CODEIGNITER..
Web client technologies	: JavaScript,Typescrip, jQuery, CSS, HTM Angular ,Reactjs, Ajax,Tailwind, Bootstrap.
Web client technologies	: Flutter, React Native, Ionic.
RDBMS	: Oracle 11g, 12 C, MySQL, MONGODB.
Operating System	: Windows, Linux.
Source Control	: GitHub.
Web Server	: Nginx, Apache Tomcat.
Designs	: UML, Design Pattern.

ORGANIZATION DETAILS

Organization	Designation	Duration
BSIC BANK SUDAN	Software Developer	01 2015 to 06 2021
DUBASKY	Senior Software Developer	06 2021 to 09 2021
ADS group	Senior Software Developer	10 2021 to 06 2022

PROJECTS DETAILS

Organization : "BSIC bank Sudan"

Duration : 04 2017 to 07 2017

Project #1

Title	: Credit Plus
Client	: BISC Bank Sudan
Domain	: Banking
Project Type	: Development
Team Size	: 1
Role	: Full stack developer
Period	: 04 2017 to 07 2017

Technologies used: Laravel 5 , Angular 4 (Typescript), HTML, CSS, SASS.

Project Description:

In August 2016 the bank started using new Core Banking (Amplitude from Sopra Banking) which one of the best banking softwares but it had big drawback because it has no capacity for dealing with Islamic banking and the bank had very hard time to sync the credit files which the central bank credit scoring agency and there was fines for the delay, so I was able to create web application using the core banking reports database to manage and send the data to the central bank scoring agency. and it's running find until now.

Roles and Responsibilities:

- Making the system analysis after getting the business logic and the database structure.
- Investigate the technology stack and conduct meetings with leads, managers and explain to them.
- Designing the prototype and implementing it with the defined technology stack.
- Creating the web service using laravel .
- Creating responsive pages for web application using framework and Angular 5.
- Component creation, Module creation and integrating angular code and Rest services..
- Allocate the issues and make the test of the results using the agency test service to check the technical and business roles.
- Making training for the users and the management..

Project #2

Title : BSIC reports
Client :BSIC Sudan bank
Domain : banking.
Project Type :Development
Team Size : 5
Role : Full stack developer
Period : 03 2019- 09 2019

Technologies used:Laravel 5 , Angular 4 (Typescript), HTML, CSS, SASS.

Project Description:

In 2019 the bank made changes in the management and there was difficulties to find the needed reports and kpis for the bank and the central bank, reports committee was created to find a solution by selecting team member from each department and explain to ways to make each of the reports and our tech team had the responsibility to make the software so no one have to waste any time making reports and invest the time to increase the bank productivity.

After six month of hard work we shipped the software which was giving any user any report needed given the user roles and permissions.

Roles and Responsibilities: (please mention all roles and responsibilities as technically detailed as possible)

- .Worked as a Tech lead and involved in requirement gathering directly with the committee.

- Creating the backend server using Laravel and configuring stripe connect to collect payments for the clients .
- Creating responsive pages for web applications using framework and React.

Project #5

Title : MOQC
Client :Mohammed Bin Obid Center
Domain : Education,CMS,Social Media ,Radio
Project Type :Development
Team Size : 3
Role : Team leader
Period : 10 2021 to 04 2022
Website : <https://staging.moqc.ae/>

Radio : <https://radio.moqc.ae/>
Social Media : <https://staging.moqc.ae/media/>

Technologies used: Laravel, NODEJS , Reactjs, React Native, HTML , CSS.

Project Description:

MOQC platform contains a CMS to manage the center website, E-learning system for the center students, social Media platform and Radio running in web and mobile.

Roles and Responsibilities:

- .Worked as a Senior full stack developer/Tech lead and involved in requirement gathering directly with client.
- Leading a team of 3 and mentoring Team members for their issues in code and logical implementation.
- Investigate the technology stock and conduct meetings with leads, client and explain to them.
- Designing the prototype and implementing it with the defined technology stock.
- Creating responsive pages for mobile application using React native and Reactjs for web..
- Backend creation using Laravel and NODEJS.
- Plan and estimate projects and reports hours to administration for billing.
- Allocate the issues to the team member's with JIRA task number and generate the report.

Project #6

Title : Boom the beauty room E-commerce platform
Client : Boom the beauty room - UAE Abu DHbai
Domain : E-commerce,retail.
Project Type :Development
Team Size : 1
Role : Full stack developer
Period : 01 2022 to 04 2022
Website : <https://bthebeautyroom.com/>
Android App : https://play.google.com/store/apps/details?id=com.bthebeautyroom.store&hl=en_US&gl=US
IOS App : <https://apps.apple.com/us/app/boom-the-beauty-room/id1602074659>
Technologies used: Laravel, React, Flutter, HTML , CSS.

Project Description:

Boom ecommerce is website using React and laravel and mobile application using flutter android and ios.

Roles and Responsibilities:

- .Worked as a Senior full stack developer involved in requirement gathering directly with client.
- Investigate the technology stock and conduct meetings with leads, client and explain to them.
- Designing the prototype and implementing it with the defined technology stock.
- Creating responsive pages for mobile application using Flutter and Reactjs for web..
- Backend creation using Laravel .
- Plan and estimate projects and reports hours to administration for billing.
- Allocate the issues to the team member's with JIRA task number and generate the report.

Project #7

Title : Banga
Client :Banga
Domain : Real estate,Listing.
Project Type :Development
Team Size : 1
Role : Full stack developer
Period : 05 2022 to 06 2022
Website :<https://banga.sd/>

Android App :<https://play.google.com/store/apps/details?id=sd.banga.sd>

IOS App :<https://apps.apple.com/ae/app/bangaa/id1630524247>

Technologies used: NODEJS , Reactjs, Flutter, HTML , CSS.

Project Description:

Banga is a real estate listing application running on web and mobile.

Roles and Responsibilities:

- .Worked as a full stack developer involved in requirement gathering directly with clients.
- Investigate the technology stock and conduct meetings with leads, clients and explain to them.
- Designing the prototype and implementing it with the defined technology stock.
- Creating responsive pages for mobile applications using Flutter and Reactjs for web..
- Backend creation using NODEJS.

Project #8

Title : Hash Zone

Client :Hash Zone

Domain : E-commerce,retail.

Project Type :Development

Team Size : 1

Role : Full stack developer

Period : 05 2022 to 06 2022

Website : <https://hash-zone.com>

Android App : <https://play.google.com/store/apps/details?id=com.hashzone.ksa>

Technologies used: NODEJS , Reactjs, Flutter, HTML , CSS.

Project Description:

E-commerce platform for web and mobile with multi vendors in KSA and Sudan.

Roles and Responsibilities:

- .Worked as a full stack developer involved in requirement gathering directly with clients.
- Investigate the technology stock and conduct meetings with leads, clients and explain to them.
- Designing the prototype and implementing it with the defined technology stock.
- Creating responsive pages for mobile applications using Flutter and Reactjs for web..
- Backend creation using NODEJS.

Project #9

Title : Stay in hatta

Client :Stay in hataa L.L.C

Domain : Real state, Booking.

Project Type :Development

Team Size : 1

Role : Full stack developer

Period : 12 2021 to 01 2022

Website : <https://stayinhatta.com/>

Technologies used: NODEJS , Reactjs, HTML , CSS.

Project Description:

Stay in hatta is booking website to book a real state in Hatta.

Roles and Responsibilities:

- .Worked as a full stack developer involved in requirement gathering directly with clients.
- Investigate the technology stock and conduct meetings with leads, clients and explain to them.
- Designing the prototype and implementing it with the defined technology stock.
- Creating responsive pages for mobile applications using Flutter and Reactjs for web.
- Backend creation using NODEJS.

EDUCATIONAL QUALIFICATION

- .BSC in Statistics and computer science Neeelain University 2008 - 2013.
- .High diploma in computer science Neeelain University 2014- 2016.
- MSC in Statistics Neeelain University 2016- 2018.
